Dear Parents / Carers,

School Site Update

As many of you will be aware our new sign-in system at the main office has been installed along with a new magnetic door release for the main entrance door. This has helped to further enhance our site security and we have already received much positive feedback from parents – thank you.

During the half term break the work to install our new security fence on the big field will begin. The majority of the work is being funded by the Diocese following our successful bid to develop our site security.

I have been informed by the contractors that they expect the work to take approximately three weeks and they hope to be completed and off site by 9th November. Please be aware that when we return after the school break the contractors will still be on site and work will still be ongoing.

Unfortunately our trim trail is currently broken and is not to be used - it will remain out of bounds until further notice.

We therefore request that you take care and closely supervise your child/children when entering and exiting the premises by the main driveway to ensure all members of our school family stay off the field and remain safe.

Many thanks for your support and understanding,

Julia Matson
